

Ignition Interlock Device

You have been found guilty of an OWI or PAC charge and the court has ordered: **(1)** an ignition interlock device (IID) installed on every vehicle that is titled or registered in your name **(2)** a restriction of your operating privileges to only vehicles equipped with an IID **(3)** payment of a \$50.00 ignition interlock surcharge.

The IID restriction period is a minimum of one (1) year. The Court will notify the Department of Transportation (DOT) of all court orders requiring IID installation. You will not be able to obtain an occupational license or reinstate your regular license unless you provide the DOT with proof that an IID has been installed on every vehicle that is titled or registered in your name. The occupational license or reinstated regular license will have Class D operating privileges restricted to vehicles equipped with an IID.

An ignition interlock device (IID) or breath alcohol ignition interlock device (BIID) is a mechanism, like a breathalyzer, installed to a motor vehicle's dashboard. Before the vehicle can be started, the driver must first exhale into the device. If the breath alcohol concentration analyzed result is greater than the programmed blood alcohol concentration (.02%), the device prevents the engine from starting.

Pursuant to State law, the Chemical Test Section of the Wisconsin Division of State Patrol is responsible for evaluating IIDs and approving manufactures and their devices for use in the State. There is a list of approved vendors on the DOT's website at <http://www.dot.wisconsin.gov/statepatrol/services/chemtest.htm>. Please check their website for possible updates. Below is a list of currently approved IID manufacturers. The vendor will provide operational instructions at the time of installation.
